

An HMT Company

KNOCK DOWN TANKS

If you are in the market for API-650, API-620, API-653 or AWWA storage tanks and you have local construction capabilities, then prefabricated “Knock Down” tank kits may be just what you need to support your construction project.

Pasadena Tank Corporation (PTC), an HMT Company, offers an entire tank kit consisting of tank design, erection

drawings, welding procedures, material procurement, prefabricated knock down tank components, and accessories shipped directly to your project destination on time.

Contact your local HMT/PTC representative to discuss the full suite of products and services that will satisfy your above ground storage tank needs.

ENGINEERING

Pasadena Tank Corporation (PTC) offers engineering and design services for new and existing facilities in the petroleum, petrochemical, power, industrial and water markets.

All work at PTC is executed in accordance with the latest applicable API, and AWWA Standards.

Our company operates under the standards of a quality management system certified to ISO 9001. Our technical team members are experts in translating conceptual designs into working drawings that consider safety and constructibility issues as an integral part of the completed tank project.

FABRICATION

At Pasadena Tank Corporation, all of your tank work is performed in-house to assure your schedules and quality expectations are met. PTC tank experts handle every facet of your project from material procurement through fabrication and ready for shipment.

Our manufacturing complexes are strategically located in the heart of one of the largest concentrations of above ground storage tanks in the world for petroleum, petrochemical

and refining facilities. PTC offers precision steel fabrication of tank components in a knock down condition ready for field erection and welding at your project location. The PTC Houston shops have over 85,000 square feet of fabrication under roof and serviced by overhead cranes. With this capacity, we can handle storage tank projects of any size.

PTC uses state-of-the-art fabrication equipment for computerized burning,

rolling of materials, automated welding processes, and environmentally controlled blasting and coating services to meet your project requirements.

ACCESSORIES

Whether you cover your tank with a geodesic dome, cable suspend aluminum roof, need a floating suction system or just need an up to date seal system, HMT offers a full line of accessories for aboveground storage tanks.

With a global network of partners, HMT is always available to satisfy all of your aboveground storage tank needs no matter where on the planet you reside.
