

Protecting your world, one tank at a time®

SECONDARY WIPER SEAL

The HMT Secondary Wiper Seal is a proven secondary seal that has been protecting storage tanks in the AST industry for over 30 years. The Secondary Wiper Seal has exceptional gap sealing ability, long service life and a maintenance free operation. The HMT Secondary Wiper Seal is designed to accommodate wide rim space variations and will return to the tank without special attention if the tank is overfilled.

For a field-proven secondary seal that will stand the test of time, choose the HMT Secondary Wiper Seal.

Key benefits:

The HMT Secondary Wiper Seal's primary benefits include:

Exceptional gap sealing — support plates constructed of stainless steel ensure tension will hold up year after year and seals won't gap

Excellent longevity — the HMT Secondary Wiper Seal is made of high-quality, corrosion-resistant, inert materials; this seal generally will outlast other seals on the market

Maintenance-free operation — workhorse design and materials

Key design features:

- Double layer wiper allows for built-in flexibility, less tip pressure and longer service life
- Narrow support plates ensure the seal will conform well to local shell abnormalities
- Premium fabrics for long-life and durability
- Bolt-on design for easy, fast installation
- No hot work required; can be installed while the tank is in service
- Wide range of metals and elastomers available for varying service requirements
- Vertical or horizontal rim mount
- Designed with guidance from EPA and local regulations

Other benefits and options

- Wide range of metallic and non-metallic materials available for various service conditions
- Seal will return to the tank without special attention if the tank is overfilled
- Patented "Mobil" wiper tip available for riveted shell tanks
- Vertical or horizontal rim mount
- Double layer wiper for greater flexibility and longer service life
- Designed with guidance from EPA regulations
- No metal fasteners, such as bolts or pop-rivets in vapor space to cause sparking
- Foam flow openings available
- Shunts for dissipating static electricity installed above seal

ABOUT HMT

HMT is the global leader in aboveground storage tank solutions. HMT provides advanced solutions to reduce emissions, optimize tank capacity, reduce stranded inventory and engineer a tank system that exceeds safety standards and extends maintenance intervals.

HMT's full suite of tank products includes: Internal/External Seal Systems - Internal/External Floating Roofs - Drain and Floating Suction Systems - Aluminum Domes - Emissions Reduction Devices.

HMT's quality services include: Tank Repair & Maintenance - Floating Roof & Seal Repair/Replacement - Installation Services - Fabrication Services - Project Management/Turnkey - Inspection, Calibration, Verticality & Roundness Studies - New Tank Construction - Painting, Coating & Lining - Engineering Services.
